

## Attention: Housing Managers

The Indigenous Housing Quality Analyst Program (IHQAP) is designed to provide ideas and solutions to improve the housing supply chain in Indigenous communities in Manitoba. The IHQAP project will build capacity for communities, provide opportunities for future employment and a pathway for well planned, community-specific sustainable housing upgrades.

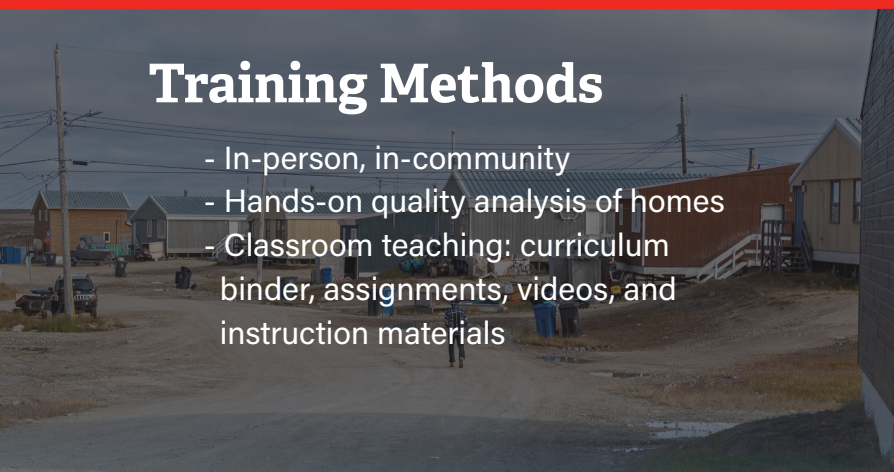

The purpose of IHQAP is to train community members, in their First Nation community, to become Housing Quality Analysts while providing their community with an inventory assessment of the condition of the homes. The IHQAP program could provide your community members free training!

### Training Content

- Energy Efficiency
- Exterior, Foundation
- Roof, Attic
- Basement / Crawlspac
- Electrical, Heating, Ventilation, Air Conditioning
- Water Heater, Plumbing
- Washrooms, Laundry, Sinks
- Interior, Doors, Windows
